GET A SMILE THAT GOES WITH YOUR FACE AND YOUR PERSONALITY

A smile is not just about your teeth. It has to be as unique as you. When you get a smile makeover it is very important that your dentist takes into account various landmarks on your face, the shape of your face and your personality.

That is why we have introduced the latest concept in smile makeover- **Facially Driven Digital Smile Design!**

The picture on right shows a few common facial features taken into account while designing your smile.

On the next page see how what the shape of your teeth convey about your personality

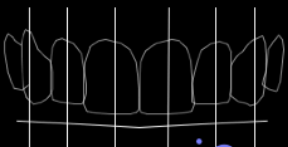

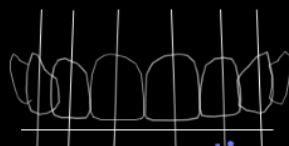

Did you know the shape of your teeth convey personality traits!

<p>Sensible</p>  <p>Melancholic Oval</p> <p>Organized Perfectionist Artistic Abstractive Timid Reserved</p>	<p>Dynamic</p>  <p>Sanguine Triangular</p> <p>Extroverted Communicative enthusiastic Dynamic Impulsive</p>

- Natural looking beautiful smile
- Restoration of teeth according to face and personality gives a youthful appearance
- Teeth prevented from further breakdown
- Chewing efficiency restored

GOOD NEWS

We have expanded our capacity! Second operatory is now functional

ASK DR. SG

Q: I saw on your Insta posts about bite issues causing migraine. How can teeth problems cause migraine?- *Monica Kapoor*

A: If your bite is improper, the muscles of your head and jaws have to work constantly to keep your jaws in place. This puts strain on muscles which causes headache which mimics migraines. If you suffer from migraines get your bite evaluated! You might get freedom from the headaches and all the medicines :).
